

CIBEROBN WEBINARS 2024

UPCOMING MAY WEBINAR

Exploring Microbiota and Diet: Implications for Mental Health in Obesity

Microbiota alterations in
proline metabolism
impact depression

Jordi Mayneris
CIBEROBN

Consumption of
ultra-processed food and
mental and brain health in
people with obesity

Oren Contreras
CIBERSAM

MAY 29, 2024
4:00 P.M

WEBINARS PROGRAM

June 26

[LINK](#)

Probiotics, prebiotics and metabolic syndrome

Laura Isabel Arellano
CIBEROBN

Diet-driven succinate production by intestinal microbiota stimulates GLP-1 secretion by colonic enteroendocrine cells via SUCNR1

Teresa Villanueva-Carmona
CIBERDEM

July 24

[LINK](#)

New nanomedicines for brain targeting and regulation of energy balance

Rosalía Rodríguez
CIBEROBN

Revolutionizing decentralized diagnostics with photonic biosensors

Juliana de Fátima Girola
CIBERBBM

September 25

[LINK](#)

The role of saturated and unsaturated fats and ketone bodies in cognition

Núria Casals
CIBEROBN

Mediterranean diet and mental health in children and adolescents: a systematic review

Patricia Camprodon
CIBERSAM

October 30

[LINK](#)

Adipose tissue exhaustion and the progression of non-alcoholic fatty liver disease

Pablo García-Rovés
CIBEROBN

LDL binding to cell receptors and extracellular matrix is proatherogenic in obesity but improves after bariatric surgery

José Luis Sánchez-Quesada
CIBERDEM

November 20

[LINK](#)

Epigenetics for Precision Medicine in Type 2 Diabetes

Sonia García Calzón
CIBEROBN

Overfeeding-induced obesity: A robust model for exploring molecular mechanisms underlying adaptation to weight gain

Alberto Bartolomé
CIBERDEM

December 18

[LINK](#)

How the use of nutraceutical products can improve the ability to generate strength

Borja Martínez Tellez
CIBEROBN

New advances in the study of the effects of flavonoids included in the diet against type 2 diabetes

María Ángeles Martín
CIBERDEM
